

#### Technical Parameters

1. Input Voltage: 1.5-3V
2. Output Voltage: 5V
3. Output Current: 500MAH-1500MAH
4. Color: Black/White, Also can customize color for the customer
5. Use 2pcs 5#AA battery, Or 5# rechargeable battery.
6. DC-DC quick charging boosted circuit built-in, use two pieces battery can boosted to 5V, transfer efficiency can reach to more than 98%, Use new 5#AA battery can charge the android phone(2500MAH battery) to 40% within 30 minutes.
7. Built in protection circuit, When the AA battery used or the device charged full, it will stop charge by itself.
8. Only need two pieces 5#AA battery that very easy to buy anywhere then can charge your android phone/MP3/MP4/PSP/GPS anytime.
9. Size: 17mm\*17mm\*18mm
10. Output USB: micro usb
